

HITCH EQUIPMENT FASTENERS REPLACEMENT

Required tools:

1. Drilling machine
2. \varnothing 6mm drill bit
3. \varnothing 6mm washer- 2 pieces
4. \varnothing 6mm nut- 2 pieces
5. Bolt \varnothing 6x35mm

Process:

1. Take the original pin out of hitch equipment.

2. Drill apertures through old ones by \varnothing 6mm drill bit.

3. Use \varnothing 6x35mm bolt, 2 nuts, 2 washers during further operations.

4. Set the retainer spring in position.

5. Wear the washer on the $\text{Ø}6 \times 35\text{mm}$ bolt and then pass it through the hitch apertures.

6. Dub nuts on the bolt and tighten them.

Final result
